

Showcase Student Growth and Achievement With the Portfolio Tool

Documenting progress is easy for students and scalable for teachers.

EASILY CAPTURE AND SHARE LEARNING— EVEN FROM HOME

Portfolio is a great way to get started with Brightspace.

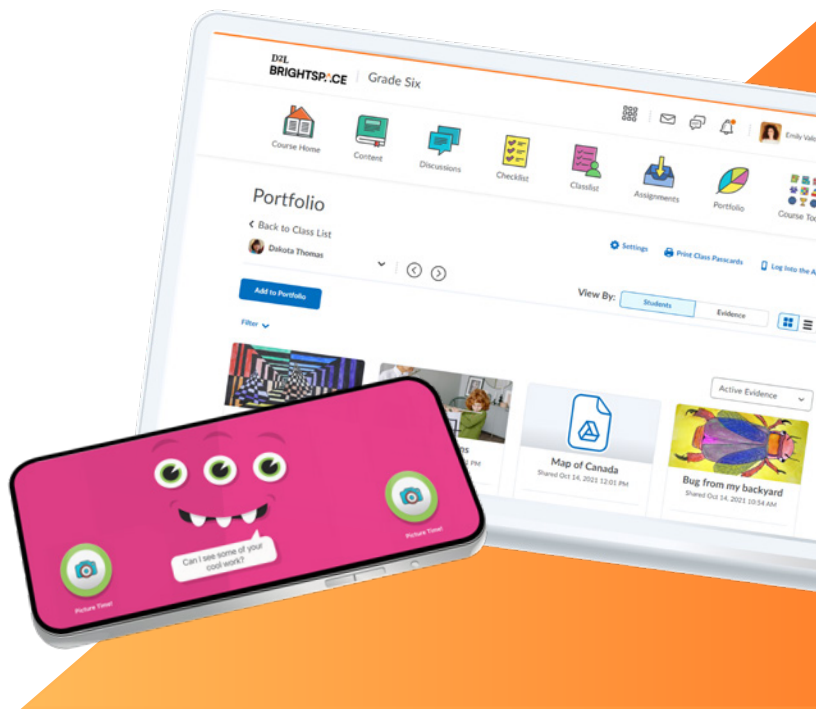

- For younger students and nonreaders, there's a guided Funster mode that leverages audio prompts to walk them through how to capture evidence of learning.
- As students grow, they can capture or upload images and video evidence with the Portfolio app, either in class or at home.
- From Brightspace, students drag and drop files for upload, or add links to evidence from Google Drive or Microsoft OneDrive.

Once the evidence has been added, students can edit details, add reflections and organize material into categories. Work is saved year after year so students can reflect on their entire learning journey.

REVIEW WORK AND SHARE WITH PARENTS AND GUARDIANS

In one central place, teachers can assess, provide feedback and share portfolio submissions with parents and guardians. Evidence can be filtered to display items by category or priority. When evaluating student work, teachers can send feedback and assess the work against course outcomes and rubrics. Teachers can also add private notes for their own reference or for collaboration with fellow teachers right in the course.
