

8 Time Saving Tools for Faculty

As the demand for personalized, technology integrated instruction grows, it's important to consider how we can best equip educators to meet these demands, all while saving valuable time. Here are eight time saving, easy-to-use Brightspace tools that empower educators to provide exceptional and captivating learning experiences.

CLASS LIST

Review, edit and access important details about all enrollments in your class in a single location. Quickly and easily email or instant message learners in bulk.

CLASS PROGRESS

View, compare and track class and learner performance. Access on-demand performance indicators in one spot, so educators don't need to visit multiple locations to collate data.

CONTENT TEMPLATES

Create engaging content quickly and efficiently with templates faculty can use semester after semester. Accessible content templates make it easy to create high-quality, consistent content.

GRADES

Powerful assessment tools allow for engaging feedback that can easily be published in bulk. Auto-grading functionalities help educators save time and provide instant feedback to learners.

INTELLIGENT AGENTS

Automate helpful nudges to learners, cutting down on administrative tasks. Once set up, Intelligent Agents can be easily replicated and copied to future courses.

QUICK EVAL

Access all evaluation submissions from all courses in a single list that can be sorted, searched and filtered. Grades and feedback can be published to students one by one or in bulk.

QUIZZES

Creating a new quiz, using an existing quiz library, or importing from a CSV file are all quick and intuitive in Brightspace. Quizzes can be easily copied to future semesters and amongst courses.

RELEASE CONDITIONS

Create a custom learning path through your course by automatically releasing enrichment or remediation content based on learner achievement.
