# Access the Right Data at the Right Time With D2L Brightspace

Data and reporting are essential to making informed decisions and measuring outcomes on a school and district level. Empower your leaders and teachers with insights that help maximize student success and drive change.

ACCESS YOUR DATA, YOUR WAY

- Access data for every tool in Brightspace by leveraging 120+ raw Brightspace Data Sets or 16 Advanced Data Sets that make it easy to get started with analytics.

- Gain flexibility in how you measure and consume your data and develop insights truly relevant to your district. Access open source code libraries and standards-based integrations so your data, downloadable data sets and timely insights can be incorporated into your normal workflows and business intelligence tools.

- Determine what's working well and where there's room to improve outcomes and return on investment. Combine data such as tool usage with grades to uncover correlations between which tools are used and how students perform.

"Thanks to the Insights tool in Brightspace, we can now dig much deeper into student *performance* and take a data-driven approach to enhancing and *improving* the way we teach and assess our courses."

Nathan Bishop, Principal, Blyth Academy

DIG DEEPER INTO DATA AND VISUALIZATIONS WITH PERFORMANCE+

- Save time with strategic, predesigned dashboards that answer your questions about course and learner engagement, adoption and assessment quality.

- Access rich visualizations, create powerful reports and communicate results using the Insights Report Builder.

- Identify and support at-risk students early on by estimating final grades, understanding where they might need extra attention, and planning ways to intervene with Predictive Analytics.

- Automate personalized learning paths for each student and help them close knowledge gaps with the adaptive learning engine.
